

## SAMPLE FACILITY MAP

Facilities are required to supply a facility map of their property. This map must include both the outdoor layout (e.g. barn and paddock locations) as well as the indoor layout (e.g. stall map) if the facility has indoor housing. This map may be reused for subsequent renewal of certification, so long as the information in it has not changed.

## Outdoor Layout

Please provide an image of the property (hand drawn or other means) and on it indicate the following features:

**Paddocks** refers to outdoor fenced-in fields or enclosures where horses are kept or exercised (e.g., pens, pastures).

**Shelter** refers to a natural or man-made structure which protects the horse from inclement weather conditions. An example of a natural shelter is a thick, mature tree line that effectively protects from inclement conditions. Examples of a man-made shelter include a run-in, three-sided shed, or a barn. For constructed shelters, there must be sufficient space in the shelter to accommodate all hoses in the paddock at the same time.

- 1. Number of paddocks:
- 2. Does each paddock have a shelter for horses?

If no, how many do not:

- 3. Natural landmarks (e.g. rivers, streams, mountains)
- 4. Location of any indoor or outdoor areas used for training, handling, and/or exercise (e.g., arenas, round pens, hot walkers)

Below is a sample grid that can be used to draw and label the outdoor layout.

## **Indoor Layout**

Please provide an image of the indoor layouts of all barns on the property and fill in the following information. On each indoor layout, please indicate the dimensions (in metres) of each stall.

Number of barns on the property:

Number of stalls on the property:

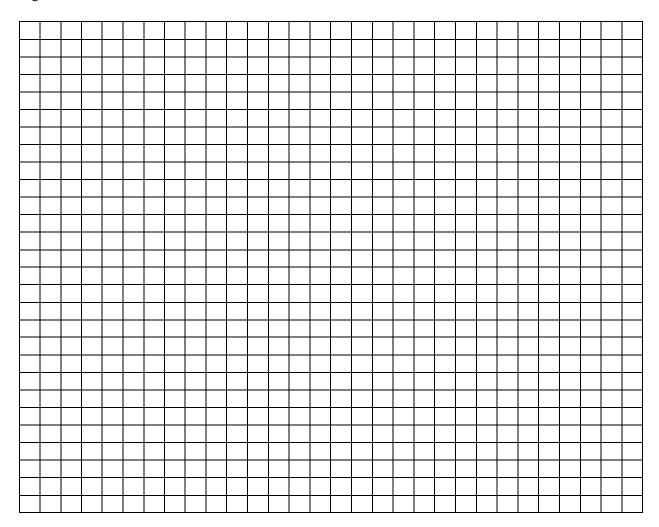

If multiple barns, please indicate the number of stalls per barn:

Barn 1: Barn 2: Barn 3:

Barn 4: Barn 5: Barn 6:

Below are a pair of sample grids that can be used to draw and label the indoor layout(s).

E.g. Barn 1:

Barn \_\_\_\_:
